Your hearing · Our passion

Viron.

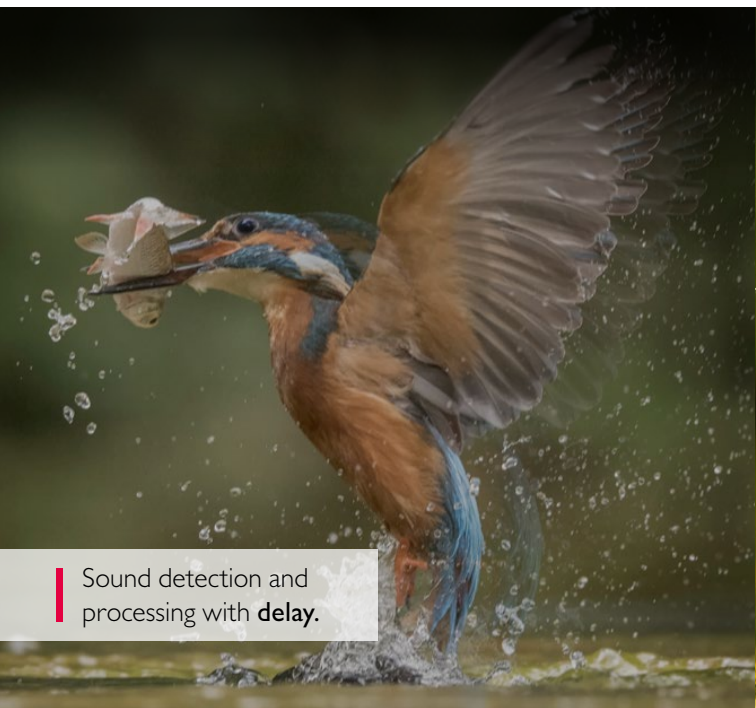

A hearing aid
that helps you
experience
sound the way
nature intended.

Instantly immerse yourself in Viron's natural sound experience

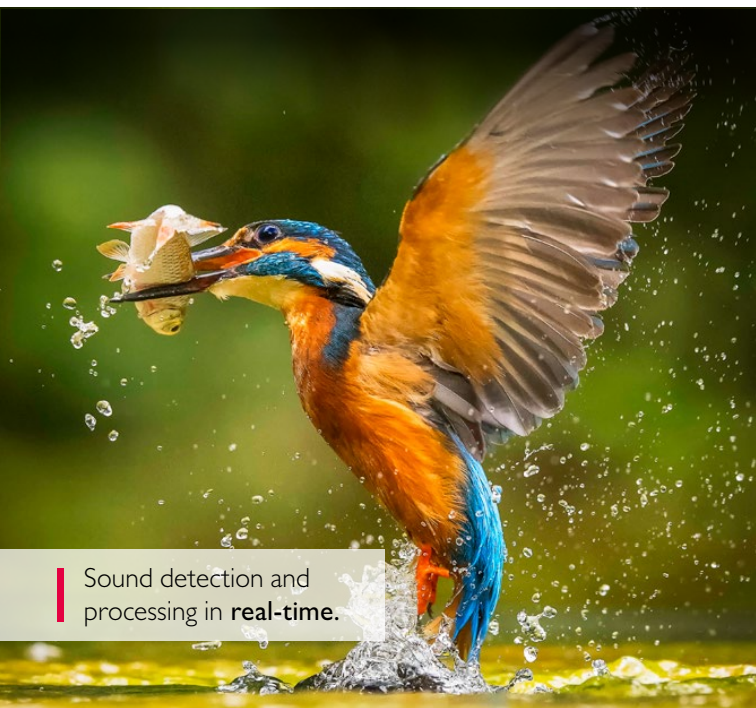

It's like taking a picture with a basic camera when your target is already on the move. The image is never quite able to reflect the beauty of the moment.

Sound detection and processing with **delay**.

In comparison, a Viron hearing aid will feel like the professional camera wildlife photographers use. It captures that moment in real-time. The system detects and analyzes the environment with 32,000 data points and processes the sound 20,000 times per second.

This True Environment Processing™ hearing aid allows you to experience sound simply closer to reality.

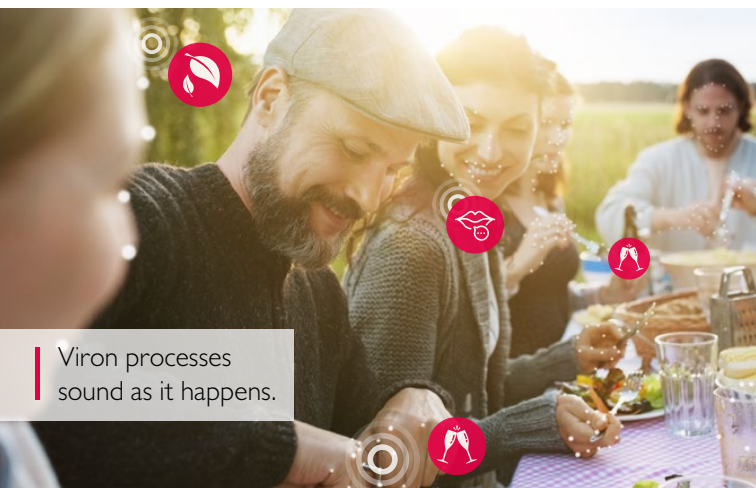

Sound detection and processing in **real-time.**

Viron helps you **be in the moment**

With Viron's core technology DECS™, we offer you a perfect combination of multiple key features to maintain natural and clear sound.

Real-time sound detection, analysis, and processing enable you to follow conversations more easily, even in challenging listening situations.*

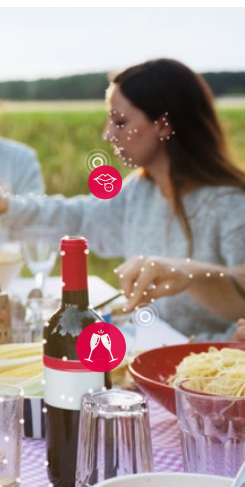

Viron processes
sound as it happens.

Adding to your comfort is Bernafon's new **Dynamic Feedback Canceller™**. Whistling sounds don't become an issue as they are eliminated super-quickly within milliseconds.

Meanwhile, Viron's industry-leading DECS™ technology provides you with maximum listening comfort and reduces your listening effort.*

Altogether, it allows you to better focus on the moment and delight in the most realistic sound experience possible.

* 2017: Based on clinical trial data acquired at Bernafon AG, Bern Switzerland

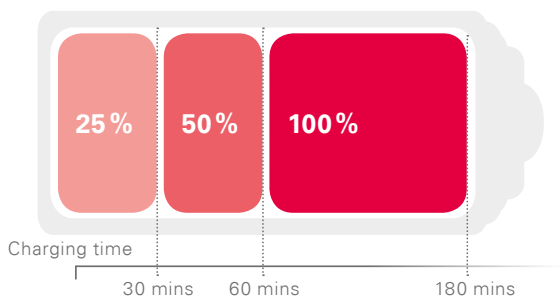

Power for the entire day with Viron's rechargeable solution

With Viron miniRITE T R you can simply forget about changing or buying batteries.

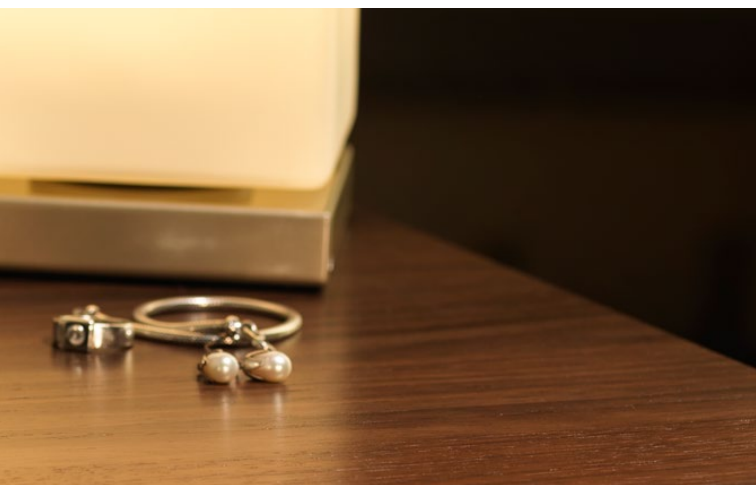

The elegant rechargeable hearing aid comes with wireless technology, a telecoil, double push button, and an LED light that displays the charging status.

Simply leave your hearing aids overnight in the compact charger.

The long-lasting, lithium-ion battery is fully charged within only three hours. Enjoy an entire day of power with Viron rechargeable hearing aids, including phone calls and sound streaming from other devices.

Viron hearing aids fit your **style and needs**

Viron comes in four behind-the-ear styles and nine different color combinations.

They are comfortable to wear, reliable, and robust with an IP68 rating for dust and water protection.

Together with your hearing care professional, choose the style that best matches your hearing loss, cosmetic preferences, and individual needs.

The stylish **miniRITE T** or rechargeable **miniRITE T R** come with many convenient options

The small **miniRITE** is discreet and barely visible behind your ear

The powerful **BTE 105** is ideal for more severe hearing losses

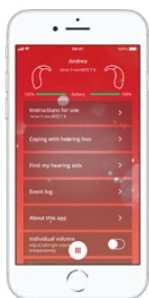

Viron offers great entertainment and control

TV-A

Stream sound from your TV directly into your hearing aids through the **TV-A adapter**. Watch your favorite films and programs at your preferred volume and enjoy premium Dolby Digital® Stereo sound quality.

EasyControl-A app

Get to know the free Bernafon **EasyControl-A** app. Change the program or volume, use the “find my hearing aid” function, or check the battery level of your hearing aids with the app.

RC-A

Regulate the volume and change programs with the discreet **RC-A remote control**. Small and slim, the RC-A fits easily in every pocket or purse, and lies comfortably in your hand.

Stream sound directly into your hearing aids

Listen to music on your favorite radio station or talk to loved ones on your smartphone. With Viron hearing aids, the sound can be streamed directly into your hearing aids, leaving your hands free for other tasks.

SoundClip-A

The **SoundClip-A** is a versatile accessory that connects to all modern Bluetooth® audio devices.* It can also be used as a remote control or a remote microphone.

Made for

 iPhone | iPad | iPod

Or do you prefer to watch your favorite TV series on your iPad® or listen to your favorite music on your iPhone® or iPod®? With Viron, you can have the sound from these devices streamed directly into your hearing aids too.*
